## FLOORS

---

**DINGE WOOD FLOORING** will blow your mind! Pictures don't do our floors justice. You actually need to see them.

Our engineered hardwood floors have many advantages over solid wood floors. The layered construction techniques used in our wide planks won't cause gaps when the winter contracts the wood fibers. Our layers won't "pop" when the summer heat swells the wood fibers. Simply put, these floors stay flat! Plus engineered flooring is more stable than solid wood floors because there is less warping and cupping. Of course, manufacturing is only one component of awesome floors. The highest factor on the floor list is of course color. Would you like that same rustic drift wood gray from the beaches of Seattle on your floors? Well we can give it to you. All we ask in return is that you come back and tell us how blown your mind is!

---

## PREFABRICATED FLOORS

Floors are of such quality to be suitable for commercial and residential spaces. Numerous door styles are available and can fit any space stylistically. Each door requires minimal prep work upon delivery. Our high standards ensure complete client satisfaction.

Floors are available in a variety of hardwood species, each species having its own unique hue. Species include:

- White Oak
- Maple
- Cherry
- Hickory
- Douglas Fir
- Ash

DINGE is a green company. We are making sure more than just your doors last through our strict adherence to environmentally sensitive manufacturing policies and procedures.

## FLOOR STYLES & SPECIES

Style: MIDNIGHT  
Species: WHITE OAK

A strong hardwood with coarse texture and deep grain. Stained wood varies from steel blue to charcoal. Topcoated wood is darker.

Style: SILVER LINING  
Species: ASH

A strong hardwood with coarse texture and deep grain. Wood is light tan but stained wood is light gray. Stained wood grain is visible and a dark gray. Unsanded grain shines like silver.

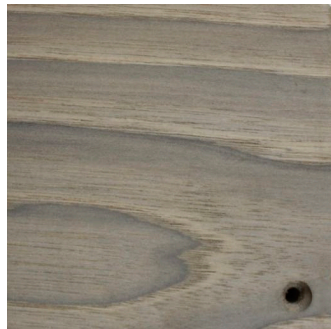

Style: RIVERROCK  
Species: MAPLE

A strong heavy wood with a tight, uniform grain pattern & smooth surface. Varies in color from white to brown and stained varies from medium to light gray.

Style: PEACOCK  
Species: WALNUT

A class all its own, with a rich, smooth grain and deep color. A very durable hardwood. Stained will be nearly black with sapwood lighter.

Style: IOWA TAN  
Species: HICKORY

Strong, hard wood with prominent grain, dramatic color shifts from gray to tan in the same panel. Stained wood has random color shifts ranging from from gray to tan.

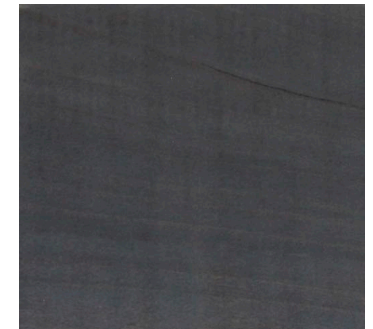

Style: MIST  
Species: SMOOTH DOUG FIR

Grain varies depending on how wood was cut- quarter sawn wood is straight and flat sawn grain is wild. Stained wood will range from silver to medium gray with green undertones with apparent grain.

Style: SMOKE  
Species: SMOOTH DOUG FIR

Softwood with grain changing depending on how wood was cut- quarter sawn wood is straight and flat sawn grain is wild. Stained wood will be deeply saturated with highly visible grain.

Style: BARK  
Species: CHERRY

Originally wood is light to medium with undertones with a uniform grain and pattern. Stained wood will be a deep, d warm gray. The Sapwood will be lighter
