DINGEWOOD FLOORS

DINGEWOOD specializes in rustic pre-finished architectural wood products for residential and commercial use, including Doors, Molding, Flooring, Cabinets, and Siding. Rather than working with reclaimed wood, our proprietary wood oxidation techniques create barnwood. Our unlimited supply guarantees you will have the materials you need, when you need them, at a price you can afford.

DINGEWOOD FLOORING will blow your mind! Pictures don't do our floors justice. You actually need to see them. The highest factor on the floor list is of course color. Would you like that same rustic drift wood gray from the beaches of Seattle on your floors? Well we can give it to you. All we ask in return is that you come back and tell us how blown your mind is!

Our goal is to deliver the highest end product at a reasonable price and expedite your job completion by dramatically reducing bottlenecks. Ultimately, we want you to rock! We want your projects to rock too, which is why we deliver awesomeness by the board foot!

PREFABRICATED HARDWOOD FLOORS

ENGINEERED HARDWOOD FLOORS

Dingewood engineered hardwood floors have many advantages over solid wood floors. The layered construction techniques used in our wide planks won't cause gaps when the winter contracts the wood fibers. Our layers won't "pop" when the summer heat swells the wood fibers. Simply put, these floors stay flat! Plus engineered flooring is more stable than solid wood floors because there is less warping and cupping. Of course, manufacturing is only one component of awesome floors.

Floors are available in a variety of hardwood species, species having thier own unique hues.

HARDWOOD Species include:

SOFTWOODS

- White Oak Hickory
- Maple
- Red Oak

- Douglas Fir
 - Pine
- Alder

Floors are of such quality to be suitable for commercial and residential spaces. Numerous door styles are available and can fit any space stylistically

Cherry

Ash

DINGE is a green company. We are making sure more than just your doors last through our strict adherence to environmentally sensitive manufacturing policies and procedures.
