## SIDING

DINGEWOOD SIDING is the best alternative to reclaimed wood. Our color and our pricing will send wicked chills up and down your spine, shocking your soul waves of delight! Our siding is known for its pristine construction standards and flexibility of design. When it comes to giving you the highest end rustic look on your walls, ceilings, or exteriors, we are your solution! Our products are S4S sealed and protected with a ten year warranty. Only FSC certified sustainable and renewable woods are used.

We specialize in delivering custom exterior siding and trim that has been pre-stained and treated to keep you exterior siding and trim to help protect your investment. D.W. products are aged to a realistic weathered finish using state of the art processes that can be topcoated for added durability. The finished look is both a gorgeous and sustainable weathered-looking material.

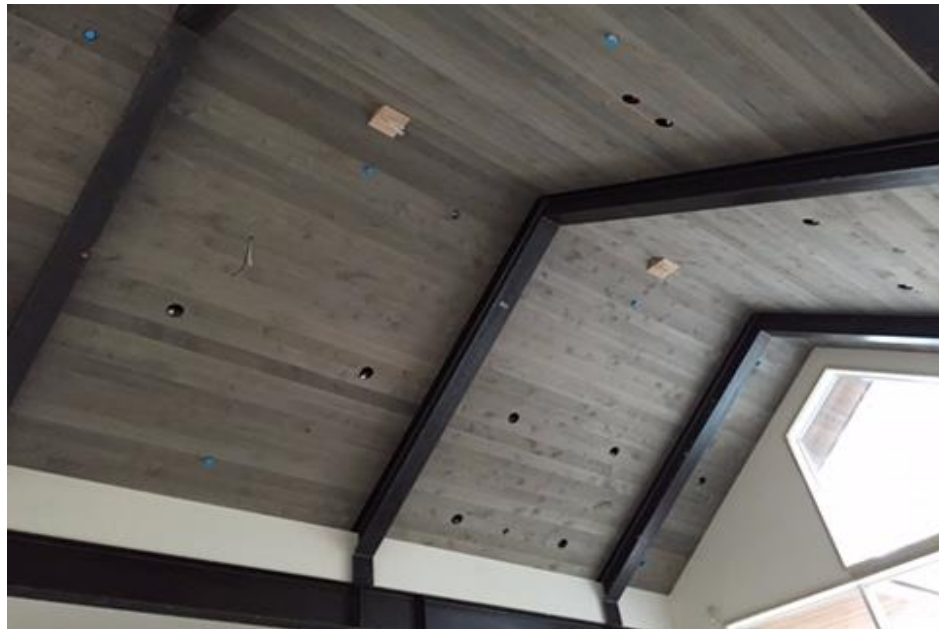

# PREFABRICATED SIDING

DINGEWOOD siding is stunningly beautiful and made from the highest FSC quality materials. Siding comes in three styles: BEVEL, CHANNEL, & TONGUE & GROOVE.

Siding is available in a variety of wood species, including:

- Red Cedar
- Douglas Fir
- Redwood
- Alder
- Hemlock
- Poplar
- Pine

Siding is of such quality to be suitable for commercial and residential spaces. Numerous styles are available and can fit any space stylistically. Siding requires minimal prep work upon delivery. Our high standards ensure complete client satisfaction.

## BEVEL SIDING

---

BEVEL SIDING

Style: BARNWOOD  
Species: ROUGH RED CEDAR

Style: BARNWOOD  
Species: VG CEDAR, SMOOTH

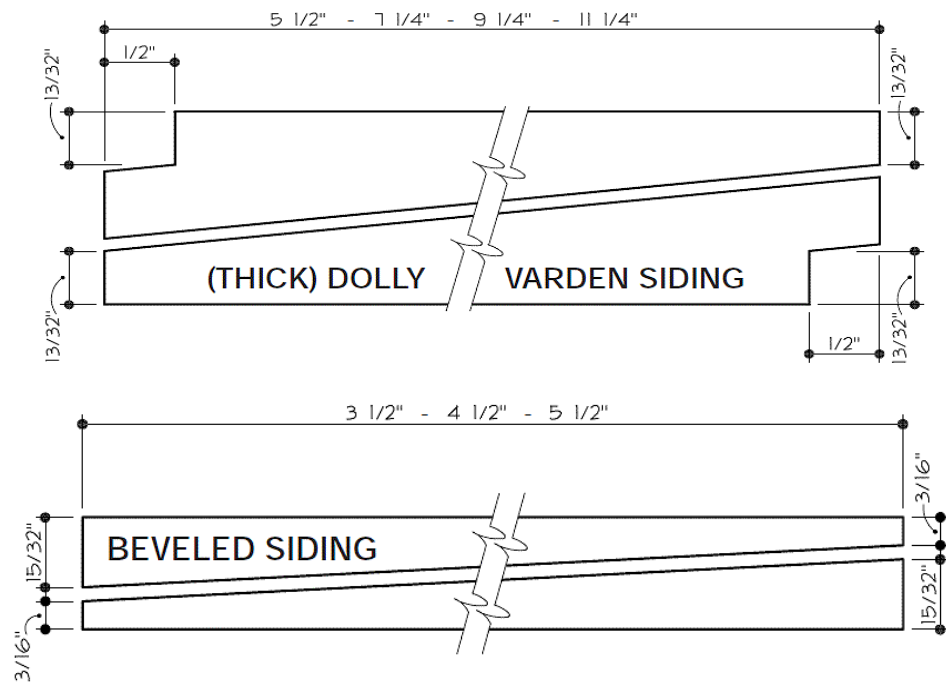

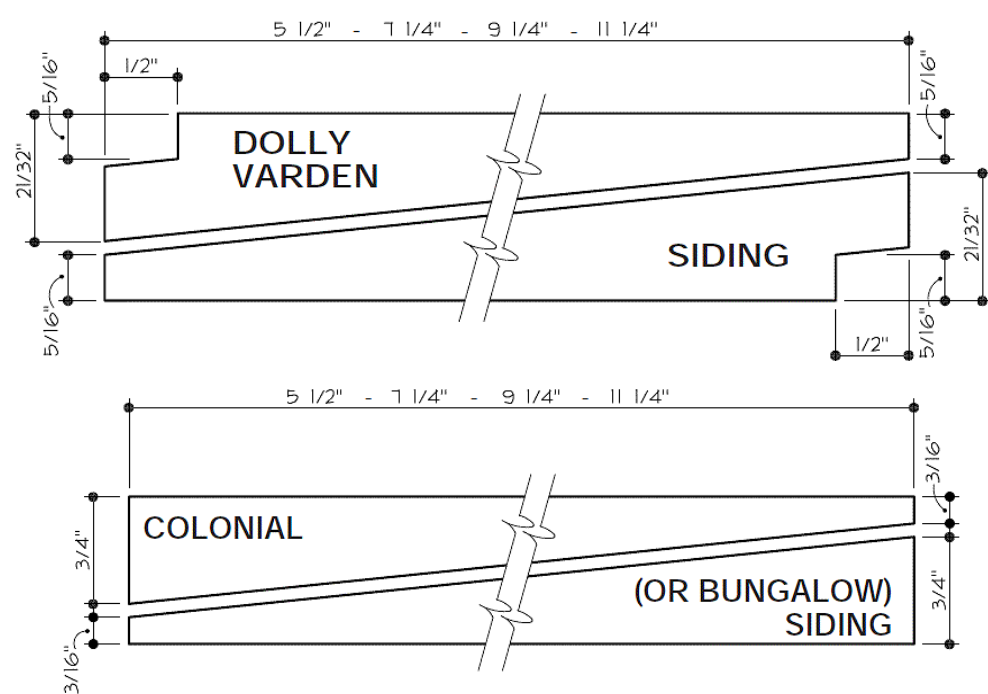

Style: CLAY  
Species: VG CEDAR SMOOTH

Style: CLAY (L) vs. BARNWOOD ( R )  
Species: VG CEDAR

**Beveled wood siding** tapers from thick to thin, which gives it a layered look and allowing gaps that let the wood expand and contract. It is produced by resawing lumber at an angle to produce two pieces thicker on one edge than the other. The manufacturing process results in pieces with one face saw textured. The other face is smooth or saw textured depending on the grade and customer preference. Bevel siding is available in clear and knotty grades.

CHANNEL SIDING

Style: CLAY (B) & BARNWOOD (T)  
Species: SMOOTH RED CEDAR

Style: CLAY (B) & BARNWOOD (T)  
Species: SMOOTH FLAT CUT CEDAR

Style: BARNWOOD  
Species: SMOOTH FLAT CUT RED CEDAR

Style: BARNWOOD  
Species: ROUGH RED CEDAR

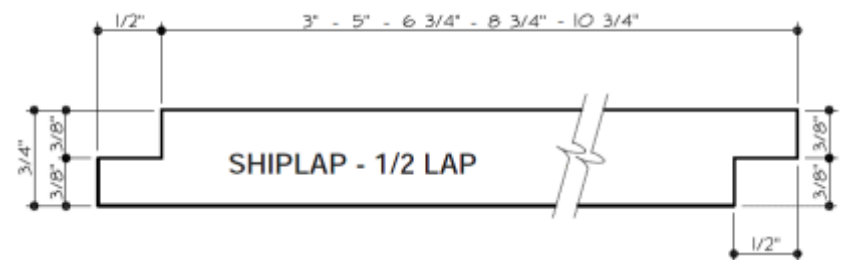

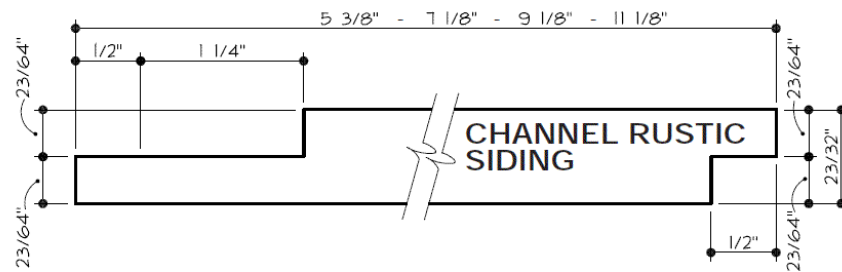

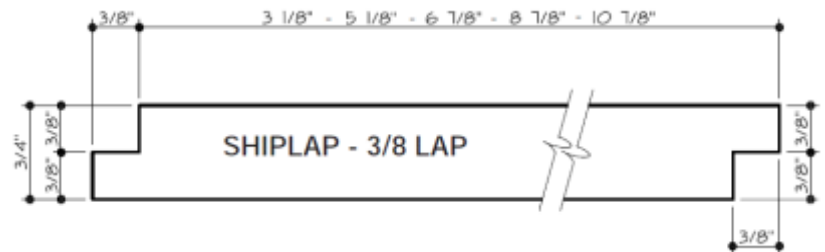

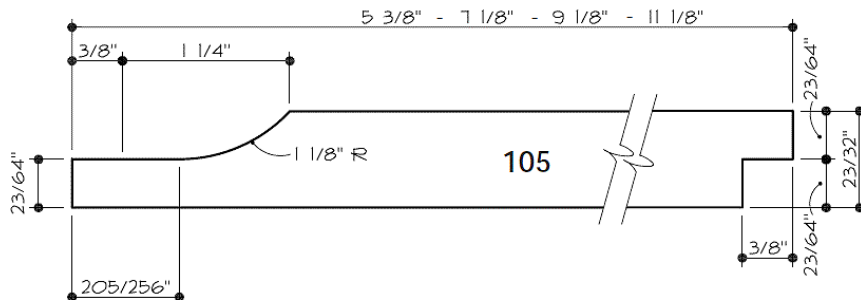

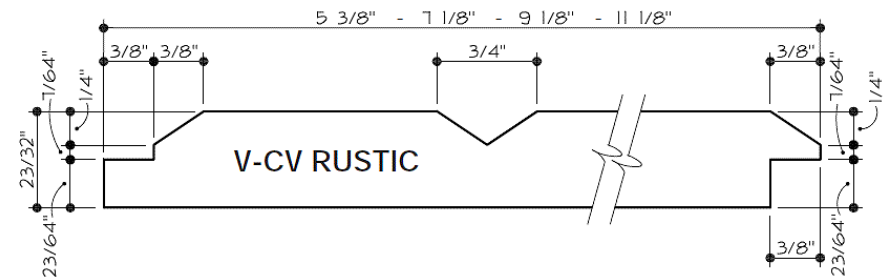

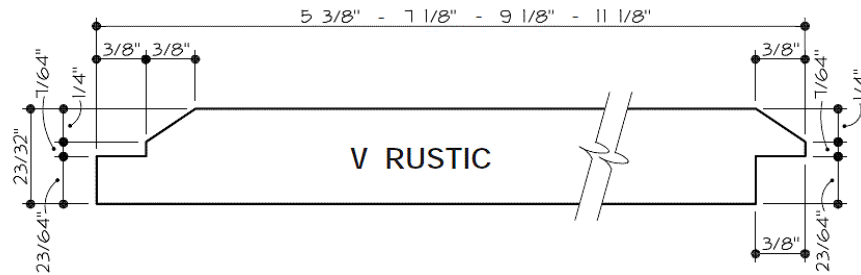

Style: CLAY  
Species: VG RED CEDAR

Style: BARNWOOD  
Species: VG RED CEDAR

Channel wood siding is a type of lap siding that leaves a "channel" or indent in the wood. Channel Rustic siding is installed horizontally with the edge of one board having a recessed area along its rear which receives the shaped top-rear edge of the board next to or below it, so as to exclude water during rainfall. In vertical applications, bevel cut the ends and install the channel siding so water is directed to the outside. Channel siding installs with a minimal amount of effort and material wastage. Channel siding is normally supplied in unseasoned knotty grades with a saw textured face side. Commonly available sizes are 1 x 8" and 1 x 10". Clear grades are milled and priced to order. Channel Rustic Siding has 1/2" overlap (including an approximate 1/8" gap) and a 1" to 1 1/4" reveal that when installed creates a channel effect between siding boards.

## TONGUE & GROOVE SIDING EXAMPLES

---

TONGUE & GROOVE

Style: OLD SILVER  
Species: ALDER

Style: WHEAT  
Species: WHITE FIR

**Tongue & Groove style of installation is probably one of the most commonly used throughout the country.** This wood siding is similar in appearance to that of Channel siding. It is produced by resawing lumber at an angle to produce two pieces thicker on one edge than the other. Tongue and groove siding is available with rough or smooth faces.

Style: CLAY (B) & BARNWOOD (T)  
Species: ROUGH RED CEDAR
